EDUCATION

University of North Carolina, Chapel Hill, NC —

Certificate – Full Stack Flex Web Development

Aug 2020 - Feb 2021

A fast-paced Javascript based web development course at UNC that focuses on MERN development (MongoDB, Express.js, React, Node.js). In a short time I've learned a vast amount about Javascript development on the front and back end, the use of many tools and technologies to assist in accomplishing tasks, as well as an improved ability to problem solve and figure out problems on my own.

South Granville High School, Creedmoor, NC —

High School Diploma

Aug 2008 - June 2012

WORK EXPERIENCE

DLS Events LLC, Raleigh, NC — *Bartender*

June 2019 - PRESENT

For this job, I report to The Ritz in Raleigh, NC. It is a small venue that hosts concerts and other events. Bartending at The Ritz is high volume and extremely fast paced. At this job, I gained skills in multitasking, customer service, team collaboration, and time management. Laid off due to Covid-19.

Flex Nightclub, Raleigh, NC — *Bartender/Barback*

Aug. 2018 - PRESENT

I barback and occasionally bartend at this bar/nightclub in Raleigh. Because of the diverse clientele at Flex, I regularly came in contact with and served people coming from all backgrounds. I've become more experienced with customer service and conflict resolution since I started this job.

SKILLS

Full-Stack Development:

HTML, CSS, JavaScript, React, Redux, Bootstrap, Material UI, React-Bootstrap, Axios, JSON APIs, NPM, Node.js, JQuery, MySQL, MongoDB, Sequelize, Mongoose, Express.js, RESTful API, MVC Architecture, CLI, Git Version Control, Agile Software Development, GitHub, PWAs, Heroku, Firebase, CrossBrowser Optimization Techniques

Soft Skills

Time management, customer service, conflict resolution, coachability, open-minded, adaptive, team collaboration, self-motivated, multi-tasking

Svannberg Construction, Raleigh, NC — Carpenter

June 2014 - Aug. 2018

A family owned carpentry business I worked in for roughly 4 years. We worked for the HOA of several neighborhoods in the Raleigh area and performed repairs on homes that were applicable. I learned a lot about team collaboration and the importance of being coachable while working this job.

PROJECTS

Pokémon Battle Royale

A Pokémon battling game which uses the PokéAPI to gather stat information on the user's searched Pokémon, then makes them battle!

Here is the [GitHub](#) link.

Weather Dashboard

A simple weather dashboard app that allows the user to search for any city in the world and returns the current forecast as well as a future 5-day forecast

Here is the [GitHub](#) link.

Day Planner

A day planning app that allows the user to input text to the hour long time blocks to plan a 9-5 work day. The time blocks will change color based on past, present, and future.

Here is the [GitHub](#) link.

README Generator

A useful developer README generator app that, once the user answers the inquirer prompts, will quickly create a nice README containing a table of contents, links to specific sections, developer contact information, and more! I use this app almost every time I create a README for a project.

Here is the [GitHub](#) link.

Escape Game

A Vampire-themed Escape Game in which the user will search for clues and solve puzzles in order to escape before the timer runs out. The user must solve the puzzles in a specific order and will obtain clues by clicking around and exploring. This is a group project utilizing the agile

development methodology. Currently a work in progress; it is missing some features but is entirely playable from beginning to end.
